CURRENTLY SOFTWARE ARCHITECT AT DIGITEC GALAXUS

ROMAN WEIS

Domain Architect & Software Engineer

Zurich, Switzerland

Experienced Domain Architect specializing in large-scale platform modernization, Domain-Driven Design, and cloud-native architectures. Proven track record in e-commerce, marketplace platforms, and financial domains with CHF billion+ transaction volumes.

BERUFSERFAHRUNG

Software Architect — AUG. 2024 – PRESENT
Digitec Galaxus AG · Zurich

- Leading architectural evolution of Switzerland's largest e-commerce platform serving millions of customers
- Designing scalable warehouse logistics systems handling 100K+ daily orders using Domain-Driven Design principles
- Mentoring cross-functional teams on architecture patterns, microservices design, and cloud-native best practices
- Driving technology modernization initiatives and establishing architecture governance frameworks
- Pioneering AI-assisted development workflows and tooling to enhance engineering productivity

Fullstack Engineer .NET/Blazor (Contract) — MAY 2023 – JUN. 2024
Axpo Group · Baden

- Architected and developed energy data platform in microservices architecture serving multi-billion CHF energy trading operations
- Implemented event-driven systems with .NET/C#, GraphQL, PostgreSQL, and Blazor for real-time market data processing
- Built automated infrastructure and CI/CD pipelines using Azure, Terraform, TeamCity, and Octopus Deploy
- Collaborated with domain experts to model complex energy trading workflows using DDD principles

Fullstack Engineer .NET/React (Contract) — JUN. 2022 – APR. 2023
Swiss Life Group · Zurich

- Developed features for insurance platform using React Relay, Hot Chocolate GraphQL, .NET/C#, MongoDB, and Kubernetes
- Led data migration initiatives from SQL Server to SAP C4C affecting millions of customer records
- Implemented scalable API designs supporting high-volume insurance policy management workflows
- Collaborated with product teams to translate business requirements into technical specifications

Founder, Architect & Developer — MAR. 2020 – MAY 2022
Stamy Booking GmbH · Zurich

PERSÖNLICHE DATEN

DATE OF BIRTH
November 19, 1985

NATIONALITY
Swiss

ADDRESS
Spyristeig 35, 8044 Zurich

KOMPETENZEN

Domain Architecture

- Domain-Driven Design (DDD)
- Strategic Domain Modeling
- Bounded Context Design
- Event Storming & Context Mapping

Platform Architecture

- Microservices & Distributed Systems
- Event-Driven Architecture
- API-First Design
- Scalability & Performance

Cloud & Infrastructure

- Google Cloud Platform (GCP)
- Multi-Cloud (Azure/AWS)
- Kubernetes & Docker
- Infrastructure as Code

Programming & Technologies

- C#/.NET Core
- TypeScript/JavaScript
- Java & Python
- GraphQL, REST APIs

Architecture Governance

- Technical Roadmapping
- Architecture Decision Records
- Technology Evaluation & PoCs
- Cross-team Alignment

Leadership & Mentoring

- Technical Leadership
- Architecture Workshops
- Developer Mentoring
- Stakeholder Communication

- Founded and architected SaaS platform for fitness and wellness industry from concept to market launch
- Designed domain model for booking, payments, and customer management using DDD and event sourcing patterns
- Built multi-cloud infrastructure spanning Azure, GCP, AWS, and Hetzner with automatic failover capabilities
- Developed multiple web frontends using Angular, React, and Next.js with shared design system
- Established technical roadmap, architecture decisions, and development practices for growing engineering team

Senior Software Engineer NOV. 2019 – FEB. 2020
Maison du Software (Planzer Spin-off) · Zurich

- Introduced Scrum methodologies and Continuous Delivery practices using Azure DevOps
- Mentored junior developers in software architecture principles and clean code practices
- Modernized legacy logistics applications serving Switzerland's largest parcel delivery network

.NET Fullstack Software Engineer MAY 2017 – SEP. 2019
Zühlke Group · Schlieren

- Modernized complex legacy tax reporting system using .NET Core, SQL Server, Docker, RavenDB, and Angular
- Contributed as fullstack engineer across multiple Scrum teams for private banking platform serving high-net-worth clients
- Applied Domain-Driven Design principles in Master's thesis focusing on software architecture modernization
- Implemented event-driven patterns and CQRS for handling high-volume financial transaction processing

Software Developer JAN. 2017 – MAY 2017
Freelance · Zurich

- Developed Java application for forex trading strategy backtesting with real-time market data analysis

Aerodynamics Engineer GT Compressor OCT. 2012 – DEC. 2016
Ansaldo Energia (formerly Alstom Power) · Baden

- Led aerodynamic design of gas turbine compressors for power generation facilities
- Modernized legacy Rolls-Royce design system using Python, PyQt, and PostgreSQL
- Managed technical integration of design software during corporate acquisition, coordinating cross-functional teams
- Applied engineering principles that later informed approach to software system design and optimization

Marketplace & E-commerce

- Payment Systems Integration
- Order Management Systems
- Inventory & Catalog Management
- User Experience Platforms

DevOps & Quality

- CI/CD Pipelines
- Observability & Monitoring
- Testing Strategies
- Release Management

AUSBILDUNG & ZERTIFIZIERUNGEN

Master of Computer Science (Grade 1.4/6.0)
University of Applied Sciences Trier - Distance Learning · Trier / Remote
GRADUATED 2019

- Master's Thesis: Domain-Driven Design, Microservices Architecture, CQRS, Event Sourcing (Grade 1.0/6.0)
- Completed distance learning program alongside full-time software engineering projects
- Specialized in distributed systems, software architecture patterns, and enterprise integration

---

Diploma in Mechanical Engineering (Grade 1.7/6.0) GRADUATED 2012
Technical University of Kaiserslautern · Kaiserslautern

- Specializations: Energy Technology, Mechanical Engineering Fundamentals, Fluid Mechanics
- Diploma Thesis at Rolls-Royce, Dahlewitz: Numerical Investigations & CFD Simulations of Casing Treatments (Grade 1.0/6.0)
- Strong foundation in systems thinking and optimization principles applied to software engineering

---

High School Diploma (Grade 2.2/6.0) GRADUATED 2007
Christian von Mannlich Gymnasium · Homburg (Saar)

- General university entrance qualification

Professional Certifications 2018 - 2022
iSAQB · IREB · Vaughn Vernon

- Certified Professional for Software Architecture, Foundation Level (iSAQB), Oct. 2022
- Certified Professional for Requirements Engineering, Foundation Level (IREB), Apr. 2019
- Domain-Driven Design Workshop with Vaughn Vernon, Sep. 2018
