born on 19th November 1985 · nationality: German

ROMAN WEIS

PERSONAL SUMMARY

Experienced Software Architect and Full-Stack Engineer with a strong foundation in both computer science and mechanical engineering. Proven track record of designing and delivering complex, scalable systems across industries including logistics, energy, finance, and retail. Skilled in .NET, React, GraphQL, cloud-native technologies (Azure, AWS, GCP), and modern architectural patterns such as Domain-Driven Design, CQRS, and event-driven systems.

PROGRAMMING LANGUAGES

- C#
- Typescript
- Java
- Python

DATABASES

- RavenDB
- SQL Server
- MongoDB
- PostgreSQL
- Neo4j

API

- REST
- GraphQL

WORK SUMMARY

Software Architect August 2024– to date
Digitec Galaxus AG, Zürich

- Served as technical lead in a team of eight within the area of logistics
- Defined and aligned software architecture improvement efforts with the product road map
- Enabled the team to adopt state-of-the-art software architecture and coding practices
- Led innovation efforts by adopting latest AI technologies in daily work and during Hackathons

Full-Stack Engineer .NET (External) May 2023– June 2024
Axpo Group, Baden

- Developed ETL pipelines for various energy data providers using .NET and PostgreSQL on 200GB+ data sets
- Designed and built a microservices-based system with a Blazor frontend, .NET GraphQL backend and PostgreSQL databases
- Automated cloud deployments to Azure using Terraform

Full-Stack Engineer .NET/React (External) Jun 2022– Apr 2023
Swiss Life Group, Zürich

- Implemented web application features using React, GraphQL, .NET Core, MongoDB, and Kubernetes
- Achieved a 10x performance improvement in SAP data integrations

Founder, Software Architect & Developer Mar 2020– to date
Stamy Booking GmbH, Zürich

- Designed and built an all-in-one SaaS platform for sports & wellness service providers, applying Domain-Driven Design, CQRS, and event-driven architecture with cloud-native technologies on GCP, AWS, and Azure; Angular and React used across frontends
- Learned React in under a month and delivered a no-code website builder, enabling website creation for customers
- Automated customer website hosting with Next.js and AWS
- Established serverless infrastructure for APIs and event handlers leveraging GCP and Azure services

- OData

AI

- MCP Server
- Semantic Kernel

FRONTEND

- Angular
- React/Relay
- Tailwind CSS
- Next.js
- WPF

CLOUD

- GCP
- Azure
- AWS

DEVOPS

- Azure DevOps
- GitHub
- Docker
- Terraform

LANGUAGE SKILLS

- German: Native Fluency
- English: Business Fluent
- Russian: Native Fluency

Senior Software Engineer Nov 2019– Feb 2020
Techgroup/Maison du Software (Planzer Spin-Off), Zürich

- Fostered a customer-focused work culture within a Scrum team, ensuring continuous delivery of business value
- Acted as technical lead, mentoring junior developers
- Provided technical leadership during the transition to cloud-native applications

.NET Full-Stack Software Engineer May 2017– Sep 2019
Zühlke Group, Schlieren

- Modernized and scaled a complex legacy tax reporting system within a Scrum team, using SQL Server, .NET Core, Docker, RavenDB, and Angular
- Contributed as a Full-Stack Software Engineer (.NET, SQL Server, Angular) across multiple Scrum teams in a major banking project with 100+ team members
- Initiated and completed a Master's thesis focused on Domain-Driven Design and software architecture

Software Developer Jan 2017 – May 2017
Freelance, Zürich

- Designed and built a Java-based platform for testing trading strategies in financial markets

Aerodynamics Engineer Gas Turbine Compressor Oct 2012 – Dec 2016
Ansaldo Energia (Formerly Alstom Power), Baden

- Designed the aerodynamics of gas turbine compressors, including flow simulations, and replaced a legacy Rolls-Royce design system with a Python- and PostgreSQL-based solution
- Modelled and implemented a large-scale SQL database for engineering design data
- Led successful integration of design software during acquisition by Ansaldo

EDUCATION

Master of Computer Science (Grade 1.4) Oct 2014 – Jul 2019
Trier University of Applied Sciences, Trier, distance learning

Master of Mechanical Engineering (Grade 1.7) Apr 2008 – Jul 2012
Technical University of Kaiserslautern, Kaiserslautern
