3 MONTHS' NOTICE · CURRENTLY PRINCIPAL SOFTWARE ARCHITECT AT DIGITEC GALAXUS

ROMAN WEIS

Principal Engineer / Software Architect

Zurich, Switzerland

Principal-level engineer combining deep system architecture, hands-on delivery, and emerging tech experimentation to ship resilient customer experiences across AI, web, and platform domains.

PROFESSIONAL EXPERIENCE

Principal Software Architect
AUG. 2024 - PRESENT

Digitec Galaxus AG · Zurich

- Shape technical strategy for logistics & digital experience domains serving millions of Swiss customers
- Lead cross-functional squads through ambiguity, balancing greenfield initiatives with core platform reliability
- Established experimentation guardrails (feature flags, canary rollouts, observability baselines) for rapid product validation
- Introduced AI-assisted development workflows, pairing engineers with coding agents to lift delivery throughput by ~20%
- Drive architectural runway reviews, ADR governance, and coaching for Staff+ engineers across the portfolio

Fullstack Engineer .NET/Blazor (Contract)
MAY 2023 - JUN. 2024

Axpo Group · Baden

- Architected energy-data services with clean boundaries, streaming telemetry, and self-serve APIs for trading teams
- Implemented IaC + CI/CD on Azure (Terraform, TeamCity, Octopus) with automated compliance checks
- Partnered with product & design leads to pilot fast feedback loops and instrumentation-first delivery

Fullstack Engineer .NET/React (Contract)
JUN. 2022 - APR. 2023

Swiss Life Group · Zurich

- Delivered GraphQL/React features for insurance advisors with progressive enhancement for mobile and desktop surfaces
- Led controlled rollout of SAP C4C data migration, orchestrating feature flags and rollback plans for millions of policies
- Improved API consistency via domain-aligned schema governance and contract testing

Founder, Architect & Developer
MAR. 2020 - MAY 2022

Stamy Booking GmbH · Zurich

- Built SaaS platform for fitness & wellness brands, covering mobile, web, and partner integrations
- Scaled multi-cloud infrastructure (Azure, GCP, AWS, Hetzner) with cost-aware observability

Senior Software Engineer
NOV. 2019 - FEB. 2020

Maison du Software (Planzer Spin-off) · Zurich

- Introduced Scrum & Continuous Delivery, reducing release cycle time from monthly to weekly

PERSONAL INFORMATION

DATE OF BIRTH
November 19, 1985

NATIONALITY
Swiss

ADDRESS
Spyristeig 35, 8044 Zurich

SKILLS

Systems Strategy & Architecture

- Domain-Driven Design
- Macro/micro architecture blueprints
- Context mapping & event storming
- Architecture Decision Records & guardrails

Platform Engineering & Scale

- Event-driven & streaming systems
- API-first platforms (REST/GraphQL)
- Modular monolith to microservices
- Performance, resilience & SLO design

AI & Emerging Tech

- AI coding agents & productivity tooling
- Generative AI for dev workflows
- Experimentation & feature flag pipelines

Full-stack Engineering

- C#/.NET (Core, ASP.NET, worker services)
- TypeScript · React/Next.js · Node.js
- SQL Server, PostgreSQL, MongoDB
- Event-driven patterns & Messaging

Cloud & DevOps

- Azure, AWS, GCP
- Kubernetes, Docker, Terraform
- GitHub Actions, TeamCity, Octopus
- Progressive delivery & observability (OTel)

Leadership & Influence

- Cross-functional squad leadership
- Mentoring Staff/Principal engineers
- Stakeholder & vendor partnerships
- Executive-ready storytelling

Product & Experimentation

- Rapid prototyping & design sprints
- Hypothesis-driven development
- A/B testing & telemetry loops
- Customer journey mapping

LANGUAGES

- Mentored engineers on clean code, testing strategies, and sustainable operations

.NET Fullstack Software Engineer
MAY 2017 - SEP. 2019

Zühlke Group · Schlieren

- Modernized legacy tax reporting for private banking using .NET Core, Docker, RavenDB, and Angular
- Co-led architecture streams for large-scale banking platform covering multi-channel customer experiences
- Master's thesis on DDD, CQRS, and event sourcing informed modernization roadmap

Software Developer
JAN. 2017 - MAY 2017

Freelance · Zurich

- Developed Java-based forex backtesting tooling with real-time data analysis

Aerodynamics Engineer GT Compressor
OCT. 2012 - DEC. 2016

Ansaldo Energia (formerly Alstom Power) · Baden

- Led aerodynamic design of gas-turbine compressors for global power projects
- Rebuilt Rolls-Royce legacy design tooling with Python/PyQt/PostgreSQL, introducing automation and telemetry
- Coordinated cross-company integration during acquisition, aligning engineering data systems

EDUCATION & CERTIFICATIONS

Master of Computer Science (Grade 1.4)
University of Applied Sciences Trier - Distance Learning · Trier / Remote

GRADUATED 2019

- Thesis on DDD, Microservices, CQRS, Event Sourcing (Grade 1.0)
- Focused on distributed systems, software architecture, enterprise integration

Diploma in Mechanical Engineering (Grade 1.7)
GRADUATED 2012

Technical University of Kaiserslautern · Kaiserslautern

- Specializations: Energy Technology, Fluid Mechanics, Mechanical Engineering fundamentals
- Diploma thesis at Rolls-Royce: Numerical CFD investigations for compressor casing treatments (Grade 1.0)

Professional Certifications
2018 - 2022

iSAQB · IREB · Vaughn Vernon

- iSAQB CPSA-F (Oct 2022)
- IREB CPRE-FL (Apr 2019)
- DDD Workshop with Vaughn Vernon (Sep 2018)
