CURRENTLY SOFTWARE ARCHITECT AT DIGITEC GALAXUS

ROMAN WEIS

Backend Lead & Software Engineer

Zurich, Switzerland

Hands-on Software Engineer with 8+ years building scalable backend systems and a foundation of 4+ years as R&D Engineer designing compressor blading for one of the world's largest gas turbines. Strong expertise in C#/.NET and Python with deep experience in relational databases and systems integration. Understands the full journey from engineering design to manufactured product.

PROFESSIONAL EXPERIENCE

Software Architect
AUG. 2024 - PRESENT

Digitec Galaxus AG · Zurich

- Leading architectural decisions for backend systems supporting Switzerland's largest e-commerce platform
- Designing and optimizing data flows between distributed services for warehouse logistics
- Driving automation initiatives to improve system reliability and developer productivity
- Establishing code review processes and best practices across engineering teams

Fullstack Engineer .NET/Blazor (Contract)
MAY 2023 - JUN. 2024

Axpo Group · Baden

- Architected and developed C#/.NET backend services for energy data platform supporting international trading
- Built automated CI/CD pipelines using TeamCity and Octopus Deploy with Azure infrastructure
- Designed and implemented data interfaces between applications and SQL databases
- Improved system observability with comprehensive monitoring and alerting

Fullstack Engineer .NET/React (Contract)
JUN. 2022 - APR. 2023

Swiss Life Group · Zurich

- Developed backend services using .NET/C# with MongoDB and Kubernetes deployment
- Led data migration initiative from SQL Server to SAP C4C affecting millions of customer records
- Integrated multiple software modules via GraphQL APIs ensuring data consistency

Founder, Architect & Developer
MAR. 2020 - MAY 2022

Stamy Booking GmbH · Zurich

- Founded and built SaaS platform from concept to production as sole technical founder
- Designed scalable backend architecture with automated deployment pipelines
- Built multi-cloud infrastructure spanning Azure, GCP, AWS, and Hetzner
- Delivered complete product autonomously with rapid iteration cycles

Senior Software Engineer
NOV. 2019 - FEB. 2020

Maison du Software (Planzer Spin-off) · Zurich

- Introduced Continuous Delivery practices and CI/CD automation using Azure DevOps

PERSONAL INFORMATION

DATE OF BIRTH
November 19, 1985

NATIONALITY
Swiss

ADDRESS
Spyristeig 35, 8044 Zurich

SKILLS

Backend Development

- C#/.NET Core & .NET Framework
- Python (Backend & Automation)
- REST APIs & Service Integration
- Microservices & Modular Architecture

Systems Integration

- Payment Systems & Gateways
- ERP & CRM Integration
- Legacy System Modernization
- Event-Driven Integration
- Data Synchronization
- Workflow Automation

Databases

- SQL Server & PostgreSQL
- NOSQL Databases (MongoDB, RavenDB)
- Database Design & Optimization
- Data Migration & ETL

DevOps & CI/CD

- Build & Deployment Automation
- GitHub, Azure DevOps & TeamCity
- Docker & Containerization
- Monitoring & Observability

Architecture & Design

- Domain-Driven Design (DDD)
- Software Architecture Patterns
- Scalability & Performance
- Technical Documentation

Agile & Leadership

- Technical Decision Making
- Code Review & Best Practices
- Autonomous Problem Solving
- Cross-functional Coordination

LANGUAGES

German Native

- Mentored team members on software architecture principles and testing strategies

.NET Fullstack Software Engineer
MAY 2017 - SEP. 2019

Zühlke Group · Schlieren

- Modernized complex legacy systems using .NET Core, SQL Server, Docker, and RavenDB
- Designed data interfaces and optimized database performance for financial applications
- Applied Domain-Driven Design for software architecture modernization (Master's thesis)

Software Developer
JAN. 2017 - MAY 2017

Freelance · Zurich

- Developed Java application for forex trading strategy backtesting with real-time data processing

Aerodynamics Engineer → Software Developer
OCT. 2012 - DEC. 2016

Ansaldo Energia (formerly Alstom Power) · Baden

- Modernized legacy Windows-based design system using Python, PyQt, and PostgreSQL
- Automated engineering workflows and data processing pipelines
- Managed technical integration of software systems during corporate acquisition
- Led cross-functional coordination between engineering and software teams

EDUCATION & CERTIFICATIONS

Master of Computer Science (Grade 1.4)
University of Applied Sciences Trier - Distance Learning · Trier / Remote

GRADUATED 2019

- Master's Thesis: Domain-Driven Design, Microservices Architecture, CQRS, Event Sourcing (Grade 1.0)
- Specialized in distributed systems, software architecture, and enterprise integration

MSc Mechanical Engineering (Grade 1.7)
GRADUATED 2012

Technical University of Kaiserslautern · Kaiserslautern

- Strong quantitative and analytical foundation
- Master Thesis at Rolls-Royce: Numerical Simulations & CFD Analysis (Grade 1.0)

Professional Certifications
2018 - 2022

iSAQB · IREB · Vaughn Vernon

- Certified Professional for Software Architecture, Foundation Level (iSAQB), Oct. 2022
- Certified Professional for Requirements Engineering, Foundation Level (IREB), Apr. 2019
- Domain-Driven Design Workshop with Vaughn Vernon, Sep. 2018
